

### New Websites

If you decide to have K&K Innovations design your new site, you'll rest assured knowing that we won't stop short of your full satisfaction. No matter which package you choose to go with, always remember that our packages are simply guidelines to help us understand what you'd like to accomplish online. Most customization you wish to have on even the simplest of sites won't cause our prices to skyrocket, just because it doesn't fit the standard product. We work for you! Just let us know what you're thinking, and we can help you accomplish your goals.

  New websites are for people who don't have a website, or are looking at redoing their site so much that they want to keep very little of their original content. If you are looking at starting a new business, you should strongly consider having a website. Many media outlets offer online advertising, which is very effective when their ad links to your site. What a good way to let the public know what you're about!

With new websites, we provide all the basic training, so you don't have to worry about learning on your own. Weather you're a car dealership or a flower shop, we can make transitioning into a new website easier than you can imagine. We'll show you how to upload photos and add content, or simply explain what your website will be emailing to you when someone makes an online purchase, and how the money is automatically deposited in your account.

Getting a new website also means you'll be able to have a new domain name. Don't worry, if you already have a domain name, we can transfer it over to our hosting server.

### Current Websites

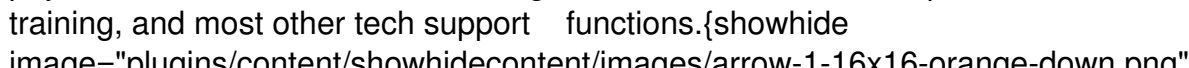

Having someone new work on your website might seem risky. After all, usually the best people to make changes is the creators. However, with K&K Innovations, your options are nearly limitless with what you can accomplish online. If you're just looking for cheaper hosting, or if you're looking at a moderate redesign, we can help. Our experienced developers can code in nearly every web format to give you just the touch you're looking for.  Making changes to a current website are for people who have an online presence, but don't feel that it's giving them the desired result. If you don't feel satisfied with what your website is doing for you, let us know and we'll give you some ideas on how the internet can better meet your needs.

We're usually able to make minor changes to wording, photos, artwork, backgrounds, and more, without redoing everything. If you're wanting much more, we can always recreate the look and feel of your website in a more fluid format, called a CMS.

Having a CMS allows you to add countless features to your site that are easy to use. Some of these features include event calendars, photo galleries, e-commerce, email forms (like you find on our contact us page, and more. Contact us for a complete list of what a CMS can do for you.

## Additional Services

K&K Innovations is more than just web development. We also offer an assortment of other services to meet the technological needs of your company. Some of these services include physical and wireless data networking, server solutions, desktop and hardware support, training, and most other tech support functions. 

changeimage="plugins/content/showhidecontent/images/arrow-1-16x16-orange-up.png"}We also offer our time on a monthly basis. A good example of this type of service is the website we did for Dan Hill ( [votedanhill.com](http://votedanhill.com) ), who ran for congress. Throughout his campaign, we made updates to his website on a weekly, sometimes a daily basis. His campaign manager had enough important things to worry about, so they hired us to take care of everything on their site for them.

If you are looking for consulting before your next big project, wanting to make sure its the best route for your company to go, or if you need some help with that pesky computer that won't boot up, give us a call.

Here is a brief list of things we can help you with:

- Website Updates
- Computer & Software (upgrades & support)
- Exchange Server
- Active Directory
- Running cable (phone & data)
- Wireless infrastructure
- Router and Switch infrastructure/configuration
- Identifying security concerns and recommendations
- Disaster planning & recovery.
- Anything else, just ask!
